Introduction to Short Filmmaking -- 3 Day Script to Screen workshop for Youth/Adults

This course will teach you everything you need to know to make a short movie. Gain hands on experience with digital video technology, learn aspects of video production including: camera operation, lighting, audio, story boarding, scripting, directing and editing. Participants will shoot on Panasonic Mini DV cameras and edit their movies using Mac iMovie.

Day One

- Screenwriting
- Storyboarding
- Introduction to visual storytelling
- Camera Operation Basics
- Lighting Basics
- Sound Recording

Day Two

- Scripts finalised
- Final drafts decided
- Shot lists and locations determined
- Shooting
- View rushes

Day Three

- Editing Principles
- Importing from camera
- Logging and capture sequences
- Sound tracks and music
- Titles & credits
- Rendering
- Exporting final edit
